Dear Friends,

On behalf of the Board of Directors, and Medical Advisory Board, I want to express our sincere appreciation to the generous donors, volunteers, partners, and staff at the Kidney Foundation of Ohio. Without their support, hard work, and dedication, the services provided to individuals impacted by kidney disease would not be possible.

To ensure we are continuing to provide the best services and programming we can offer, the Board of Directors, Medical Advisory Board, and staff, work hand in hand to assess and evaluate the changing needs in the community. The Foundation is dedicated to providing direct assistance and supportive services to patients and their families, educating renal professionals, and raising awareness of kidney disease in the community.

This past year, the Kidney Foundation of Ohio provided direct assistance to 1,031 individuals suffering from kidney disease. The Foundation gave funds to help ease the burden on the cost of medications, transportation to and from dialysis and medical appointments, emergency utility disconnections, and emergency insulin needs. In addition, with help from the community, we provided information, resources, and basic needs items to patients and their families.

In addition to direct assistance, the Foundation is committed to education. Through our Learning Series, and Renal Symposium, hundreds of health care professionals were educated on trends and topics in the renal field to better serve patients, and our Teen Summits provided high school students the opportunity to learn about chronic disease and organ donation. Opportunity is also given to individuals directly affected by kidney disease, through our Educational Scholarship, to pursue a secondary degree.

As a result of these collective efforts, we hope that individuals affected by kidney disease will attain a measurably improved quality of life, and that we can bring awareness to the devastation of kidney disease in our community.

Thank you for the continued support of the Kidney Foundation of Ohio. What makes the Foundation so very special is that every dollar raised here, stays here. We are proud of all that has been accomplished this past year, and look forward to the year ahead.

Marilyn R. Bartucci

ABOUT THE FOUNDATION

The Kidney Foundation of Ohio serves a thirty-two county area in northern and eastern Ohio and supports two affiliate chapters in Lake and Summit Counties. There are additionally five counties supported by the organization in West Virginia to assist individuals who cross into Ohio for treatment. The Foundation remains the only health and human services agency in Northeast Ohio that continues to provide direct dollars to patients to assist through the devastation of living with kidney disease.

Our Mission
We are dedicated to providing a broad-based program of direct assistance to persons with kidney disease and promoting and providing educational programming for the general public, renal professionals, and patients and their families.

Our Vision
It is our goal that all people with renal disease or transplant recipients will be accepted in the community and have a measurably improved quality of life and function as a result of the services provided by the organization.

History
The Cleveland-based Foundation was founded in 1950 by a group of parents whose children suffered with nephrosis and physicians from Mount Sinai and University Hospitals. As medical advances were made in the renal field, the Kidney Foundation of Ohio’s scope of services and coverage area grew. Initially, the small group of parents and physicians sought to provide services for patients suffering from kidney disease and to encourage and assist basic research. The Foundation soon began to develop educational programs to create professional and public interest.

By 1969, the Committee on Donor Enlistment (CODE) was established by the Foundation to encourage the public to carry organ donor cards and to donate kidneys upon death. CODE was one of the first, of the seven original, independent organ procurement organizations in the United States. In the 1970s, a partnership was formed with the Cleveland United Labor Agency and mobile clinics were integrated into the community to provide dialysis to patients needing treatment.

The Foundation has maintained a strong commitment to both professional and public education. This led to the creation of the Nephrology Fellowship for Northeastern Ohio researchers, and in 1975, the Kidney Foundation of Ohio Renal Symposium. The Symposium was recognized as high-quality education for renal healthcare professionals. In the late 1970s, the Organ Recovery Fund was established to support organ donation. Over the years, the Foundation worked closely with Eversight Ohio (formally Cleveland Eye Bank) and later on Lifebanc, to promote awareness of the need for organ donation.

In the early 1990s, financial assistance programs were formed to support patients with medication, transportation, and emergency needs. These supportive services have saved the lives of thousands of renal patients since its inception. For children ages 5-18, dialysis camps were held at Red Raider Camp (Novelty, Ohio) and Camp Cheerful (Strongsville, Ohio) providing kids with the ability to attend a week-long camp that delivered the necessary onsite dialysis treatments. During this time, a council of social workers were convened to represent the concerns and practice issues of the social worker within the field of nephrology and transplantation. This professional group convened three to four times annually to learn about new and existing practices in renal social work. In the early 2000, other disciplines joined to address the gap in communication between dialysis and transplant, and target steps to improve the competency of staff regarding treatment options for patients. This evolved into educational sessions for all renal healthcare professionals that provided continuing education credits.
In partnership with Cleveland MOTTEP (Minority Organ Tissue Transplant Education Program), in 2006, the Foundation began holding Healthy Teens, Healthy Tomorrow: Teen Summits which was an educational program intended to empower minority teens with information on organ donation and healthy lifestyle choices. These summits included breakout sessions on: nutrition & wellness, body & kidney health, organ/tissue donation, and transplantation.

Due to the dissolution of the Diabetes Partnership of Cleveland in early 2017, the Kidney Foundation of Ohio launched an emergency insulin program to assist uninsured and underinsured diabetic patients in Cuyahoga County. Diabetes continues to be the leading cause of Chronic Kidney Disease.

83 out of 88 counties in Ohio have dialysis centers
(Ohio Renal Association)

17,000 Ohioans are on dialysis
(Ohio Collaborative Dialysis Coalition)

2,338 people on the transplant wait list in Ohio
(United Network for Organ Sharing)

347 community-based dialysis centers in Ohio
(Medicare.gov)
PATIENT ASSISTANCE PROGRAMS

The Foundation maintains a strong commitment to the community by ensuring its main focus is providing support to patients and their families through direct assistance. The programs below address the financial needs of people with kidney disease and help improve treatment compliance.

Transportation Reimbursement [479 patients]
Patients require safe, reliable, and affordable transportation to and from dialysis and/or transplant appointments. This program is designed to assist patients to maximize health outcomes and meet basic human needs, leading to an improved quality of life while promoting financial stability and independence. Qualified and enrolled participants received mileage reimbursement up to $50/month, paid bi-monthly directly to the individual. In emergency situations, bus passes, cab vouchers, and gasoline gift cards were issued when no other support was available. While the Foundation is aware of other transportation programs that exist, many kidney patients do not qualify, the services are cost prohibitive, or transit schedules are not conducive to a patient who is ill after a scheduled dialysis treatment.

**FACT:** The average patient on the Transportation Program attends 13 medical appointments a month. This includes doctor visits, dialysis treatments, and transplant appointments.

Medication Assistance [274 patients]
The average kidney patient takes ten to twelve renal medications a day and prescription costs can be $600/month; this number doubles for transplant recipients. This program provides financial aid to help individuals purchase life-saving renal medications and nutritional supplements through an approved pharmacy. In emergency situations, gift cards are distributed to local pharmacies to receive immediate medications. This program is designed to assist patients to maximize their health outcomes and meet basic human needs. Providing medication assistance leads to an improved quality of life, enabling more people to live healthier, longer lives.

**Emergency Insulin**
Approved applicants obtained an emergency supply of insulin, syringes, or pen needles. The program provided 21 diabetics with access to insulin who have run out of their medication and are unable to access another supply. In addition, this program links such clients to long-term access solutions preventing another emergency situation.

**FACT:** On average, patients on our program take 12 medications a day.

Emergency Grants [178 patients]
To help lessen the financial burden of kidney disease, an emergency grant, available once a year, is issued to an individual when an incident occurs that has an impact on the patient’s life. Unexpected high utility bills, auto repairs, and medical supplies are situations where emergency grants are awarded.

**Giving Tree [100 patients]**
This program provides patients affected by kidney disease with basic need items during the holiday season. Generous donations from employees at Cleveland Clinic Glickman Institute, parishioners of St. Basil the Great Catholic Church in Brecksville, and other generous donors assisted by donating items such as gift cards, winter apparel, hand sanitizer & batteries.

“Thank you so very much for the help I have received...You have taken a great burden off my shoulders.”  
— Patient

“[The Kidney Foundation of Ohio] lets me know that I’m not in this alone. There is help if I need it.”  
— Patient
**WHO WE SERVE**

*Average Yearly Household Income = $19,216*

- **Gender**
  - Male: 51%
  - Female: 49%

- **Federal Poverty Level %**
  - 100% or below: 12%
  - 133%: 15%
  - 150%: 16%
  - 200%: 50%
  - 250%: 7%

*Application Process:* Patients submit information regarding their monthly income and expenses, type of diagnosis and treatment method, insurance coverage, and assessment provided by healthcare professionals. After careful review by the Foundation’s Licensed Social Worker, the application is approved/denied based on financial need, availability of funds, and is limited to the organization’s 37-county service area.

---

**SUPPORTIVE SERVICES**

**Information & Referral Guidance**

Living with Chronic Kidney Disease requires significant lifestyle adjustments for patients and their families. This may cause individuals to feel helpless or overwhelmed, inhibiting the person’s ability to follow treatment guidelines, resulting in poor medical outcomes. The Foundation provided support to patients and families, allowing them to take control of their health for better management and outcomes, on 450 calls throughout the year. The most common topics our patients and their families need assistance with are inability to afford medications due to sudden price increases (particularly insulin), utility disconnections, and need for transportation to dialysis or transplant appointments.

**Medical Identification Bands**

The Foundation provides personalized medical alert bands to renal patients in our service area at no cost. In emergency situations, the ID bands make first responders aware of the location of an individual’s access. We distributed one-hundred and thirty-six bands in 2019.
EDUCATIONAL PROGRAMMING

Education and outreach play a crucial role in the prevention and awareness of kidney disease. Last year, the Foundation reached over 3,500 people through outreach and educational programming.

COMMUNITY EDUCATION

Community Outreach
Staff and trained volunteers interact with the community through fairs that are designed to provide basic preventive education and medical screenings. Additionally, the Foundation is available to speak to corporate employees, church groups, or schools about the signs, symptoms, and causes of kidney disease.

World Kidney Day
World Kidney Day is a global campaign aimed at raising awareness about the importance of our kidneys to our overall health, and to reduce the frequency and impact of kidney disease and its associated health problems. The Foundation hosted a free, community awareness event that featured speakers on topics related to kidney disease, blood pressure screenings, chair yoga, and the opportunity to visit with local health organizations to patients, family members, caregivers & the community.

YOUTH EDUCATION

Healthy Teens, Healthy Tomorrow: Teen Summit
In partnership with Cleveland MOTTEP (Minority Organ Tissue Transplant Education Program), Teen Summits provided education and information regarding positive lifestyle choices and risk factors contributing to chronic illness to minority teens. In addition, the summits promoted personal responsibility for health-related decisions, including becoming an organ donor. Full-day sessions take place in the fall and spring, and aim to empower students with a heightened sense of health awareness. The Foundation hosted two events and educated nearly 200 students.

PROFESSIONAL EDUCATION

Renal Symposium
This two-day interdisciplinary conference featured nationally recognized experts in the field of renal health care and addressed the latest issues and innovations in dialysis and transplantation. Nearly 400 renal professionals from various companies throughout Ohio and surrounding states were in attendance. Continuing Education Units (CEUs) were available for dietitians, nurses, social workers, technicians and transplant coordinators. Session topics included: Fluid Overload in the Kidney Patient, Time for a Change: Precision Medicine Project and KidneyX, Overview of Diabetes Devices & Technology, and Transplantation in 2020.

Professional Learning Series
In partnership with University Hospitals Transplant Institute, the Kidney Foundation of Ohio offers educational sessions to healthcare professionals to help bridge the gap between dialysis and transplant, and provide resources to better serve patients. Topics included: How to Improve Nutritious Food Access in Low-Income Communities, and Recovery of Organs From Drug Overdose Deaths. More than 100 dietitians, social workers, nurses, and other renal professionals attended these sessions.

AWARD RECIPIENTS

Oscar Chaves, RN, BSN received the Marilyn R. Bartucci Excellence in Nephrology Nursing Practice Award for his outstanding contributions in the field of nephrology and toward the mission of the Kidney Foundation of Ohio.

Rhonda Lange from Centers for Dialysis Care, received the Torchbearer Award in Memory of Barb Guthrie for her commitment to personal and professional development, contributions in the community through volunteer service and serving as a role model for others.
EDUCATIONAL SCHOLARSHIPS

This opportunity is designed to assist a kidney patient, or child of a patient, achieve their academic goals and complete a college or technical school education. Financial support is provided to students who have been diagnosed with kidney disease (or child of a kidney patient), demonstrates financial need and resides in the Foundation's service area. Three individuals were selected to receive scholarships that are renewal for up to four years.

ALI

Kidney failure is hereditary in Alexandra's family. Her father, Joel, was placed on dialysis in 2016. Prior to starting dialysis, he was a high-risk prostate cancer patient.

Alexandra currently works two part-time jobs to help support her family, and her own educational and financial goals. Although she has suffered from depression and anxiety due to the stresses of her father’s medical needs, Alexandra continues to persevere as she attends Cuyahoga Community College. She strives to obtain a degree in Early Childhood Education.

LARRIA’N

Larria’n has watched her mother struggle with End Stage Renal Disease (ESRD) her entire life and has spent hours with her during dialysis treatments. While her mother had received a kidney transplant, it only provided a short relief for the family, as the kidney has since failed. Larria’n’s mother has now been able to perform in-home dialysis treatments, which she does at least five days a week. After seeing the constant battle her mother faces from ESRD, Larria’n has been encouraged to work harder. She is a student at Notre Dame College studying Special Education. Throughout her academics, Larria’n is determined to provide her mother with the support she needs.

JAMI

Due to a birth defect, Jami had one of her kidneys removed when she was only one and a half years old. Throughout childhood she struggled with frequent kidney infections that finally eased when Jami became an adult. In college, she was hospitalized with a life-threatening infection and kidney stones during her last semester at the University of Akron, which forced her to withdraw from school. Scarring from Jami’s health issues, as well as a few subsequent infections, caused her remaining kidney to eventually fail.

In 2015, Jami was diagnosed with End Stage Renal Disease (ESRD) and received a successful transplant at the end of 2019. Through social media, Jami has become heavily involved with educating people about ESRD while on her own quest to find a kidney donor, and created a Facebook support group for transplant recipients. Since her diagnosis, Jami has gone back to school and is a rising senior at Cleveland State University where she plans to obtain her degree in Social Work.
Fundraising Events

Several fundraising events are held each year to raise funds for the Foundation’s direct assistance, supportive service, and educational programs. In 2019, nearly $370,000 was raised.

Kidney Foundation of Ohio

Annual Gala
The 27th Annual Kidney Foundation of Ohio Gala brought together nearly 250 guests to celebrate the 2019 Person of the Year, Dr. Ronald Flauto. He was recognized for his outstanding leadership and contributions in the field of nephrology and for his dedication to the mission of the Kidney Foundation of Ohio. Guests enjoyed dinner, silent and live auctions, a personal story from an individual impacted by kidney disease, and live entertainment.

Golf Outing in Memory of Dennis Kennedy
The annual golf outing is held in memory of Dennis Kennedy, who worked as the Director of Technical Services for Centers for Dialysis Care (CDC). Dennis started a golf outing for CDC employees and dreamed of one-day golfing at Pebble Beach until his passing in 1996. His coworkers decided not only to memorialize Dennis by continuing the golf outing, but also turn it into a fundraiser for his second love, kidney patients. Although the day was cut short due to rain, more than 100 attendees enjoyed a morning of golf, food and drink, games, raffles, and prizes.

Summer Soiree
The annual summer event hosted nearly 150 guests at the Music Box Supper Club in Cleveland to celebrate Christmas in July. Guests enjoyed a beautiful view of the Cleveland sky/lne, dinner, drinks, silent auction, raffles, costume contest, and live entertainment.
Harvest Walk & 5K
The Annual Harvest Walk & 5K brought together nearly 500 community members at Mapleside Farms for a one-mile walk and 5K run. Event attendees enjoyed a day of family fun with a DJ, mascots, crafts, balloon artist, the opportunity to visit with local health and wellness organizations, and admission into Mapleside’s Pumpkin Village.

Robert won the 14 & under age group for the Harvest Walk & 5K. He received his new kidney in August of 2014 at just two and a half years old. Winning this medal meant the world to him and his family, as he had just been in the hospital days before the race.

Summit County Chapter

Hot Dog Reverse Raffle
The annual Reverse Raffle was hosted at Getaway Pub in Akron. Nearly 100 guests enjoyed food, beverages, sideboards, raffles, and one lucky winner received a $500 grand prize.

La Macchina Molto Bella Car Show
The annual car show took place at Stan Hywet Hall & Gardens featuring more than 400 muscle, classic, and exotic automobiles. The night prior, over 300 people attended a pre-show party fundraiser held at Todaro’s Party Center in Akron to support patient service programs. The kick-off dinner included an open bar, wine, bourbon and cigar tasting, raffles and auctions, and live entertainment.
Volunteer Appreciation

Thank you to our dedicated volunteers for ensuring the success of our programs and fundraisers! Our work, to benefit the patients in our service area, is not possible without your support.

Volunteer Spotlight: Stephanie Brashear

“My excitement for the birth of my daughter was immeasurable. I was ready, I took all the classes, had all the gear, had the nursery prepped and hospital bag packed. When I didn’t go into labor naturally at 41 weeks, my doctor thought it best to induce me. After numerous interventions to speed up the process, I required an emergency c-section due to the rupture of my placenta. So much blood loss occurred in the process that my kidneys failed.

Many days in the ICU passed, my baby girl was ready to go home and I was told that I needed dialysis until my kidneys sprung back into action. I was discharged from the hospital 10 days later and completed outpatient dialysis treatments Tuesday, Thursday and Saturday from 5:45 AM to 9:45 AM at a center on W 25th.

The treatments were very taxing on me mentally and physically, coupling with the stress of having a newborn baby at home. Eventually, my kidneys started functioning on their own and I kissed dialysis goodbye after six weeks of treatment. I remember the kind staff at the dialysis center all coming out to celebrate with me when I got the news of my last treatment. I also remember the faces of the other patients in the room whose kidney function would likely never be regained. In that moment, I realized how blessed I was to have such amazing backing from my family and my health back.

I did some research and stumbled upon the Kidney Foundation of Ohio and reached out to see how I could help community members who weren’t as fortunate as I am. I hope that my very small contribution to this cause is able to ease the burden of kidney disease for even one community member in need.”

Stephanie has served on the Summer Soiree committee, and currently serves on the Harvest Walk & 5K committee. She also coordinates fundraisers at her place of employment for World Kidney Day and the Giving Tree Program. We are so thankful for Stephanie and her support of the Kidney Foundation of Ohio!
